

# IMAGINE HOUSTON

Houston and the surrounding communities are home to over 500 ABB employees. We have sales, service and engineering capabilities representing all aspects of ABB's product and solution portfolio. ABB maintains four facilities in the Houston area, each optimized to support a specific market segment, offering, or service capability.

### Westchase (at Westchase Park)

Our Westchase at Westchase Park office specializes in process automation, motor and drive packages, plant electrification and analytical systems for all industries. We can deliver standalone products, or fully engineered systems and service for all industries. We also deliver lifecycle services to the ABB installed base throughout southern Texas and the entire Gulf Coast region. Westchase is also the global headquarters for ABB's Process Automation business.

### Westchase (at CityCentre)

Our Westchase at CityCentre office is home to Ventyx. Ventyx, an ABB company, is a leading business solutions provider offering software, data and advisory services. Ventyx offerings comprise a broad range of solutions to address the most critical needs of utility, power and communications companies, including asset management, customer care, energy analytics, energy operations, energy trading and risk management, mobile workforce management and network management.

### Sugar Land

Our Sugar Land office is the North American headquarters for ABB's Network Management business. Network Management supports electric utilities with real-time systems for supervisory control, data acquisition and distribution management. Essentially these systems provide grid control for utilities, including support for new "Smart Grid" applications.

### Houston Ship Channel

Our marine service center on the Houston Ship Channel offers support for all aspects of marine automation, electrification and propulsion. We offer support for vessel power systems, machines, condition monitoring, propulsion, drilling systems, automation and control systems, switchgear and protection systems.

Making Houston's energy go further?

As energy costs continue to rise, consumers and industry leaders are searching for ways to use it more efficiently. For energy intensive industries like refining and petrochemicals, energy is a significant portion of the total production cost. Efficient energy utilization is critical to business competitiveness and bottom line results. ABB is a global leader in power and automation technologies that enable utility and industry customers to improve their performance while lowering environmental impact. ABB is proud to be one of Houston's largest energy engineering companies, supporting the efficient exploration, production, transportation, distribution and consumption of energy. # IMAGINE HOUSTON

VOLUME THREE

# IMAGINE HOUSTON

As the fourth-largest city in the nation, Houston's energy flow never ebbs. Houston provides residents with all of the amenities of a major city, including 24-hour facilities for dining, entertainment and shopping. The Inner Loop is one of the most diverse metropolitan areas in the country and features a multitude of attractions to see and do.
