WELCOME TO THE WORLD OF CAMERON

We are wherever you are. And wherever we go on our journey together, you'll discover we're there in more ways than one. We're there in global presence, in all the key plays in which you're working. We're there with experience, and we know how to work with you to deliver optimum value. We're there with the field-proven components, systems and services you've relied on for almost 200 years. In technology and innovation, we're there with practical know-how that works. Together with CAMSERV™ – Cameron's Aftermarket Services, one of the world's largest networks – we're there when you need us for the life of your asset. For the solid, industry-leading solutions partner you seek, look no further. Discover Cameron. Upstream to downstream, onshore to offshore, we're there.

RAISING PERFORMANCE. TOGETHER™

ONSHORE DRILLING

In the realm of onshore drilling, you have multiple requirements – ideally satisfied through a single, solid source. From BOPs to control systems, manifolds to wellheads – consider Cameron your one-stop shop.

OFFSHORE DRILLING

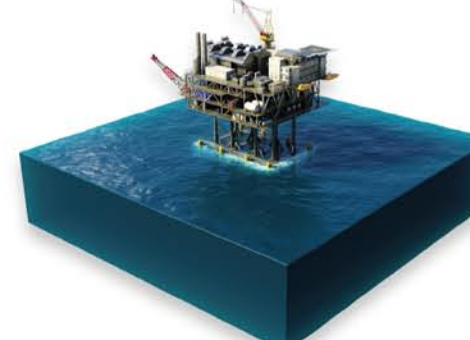

From the drilling structure on the jackup rig, from the operating deck of the semisubmersible, to the seafloor – we're delivering the field-proven technology, reliability and technical support that reduce downtime for you in critical applications everywhere.

ONSHORE PRODUCTION

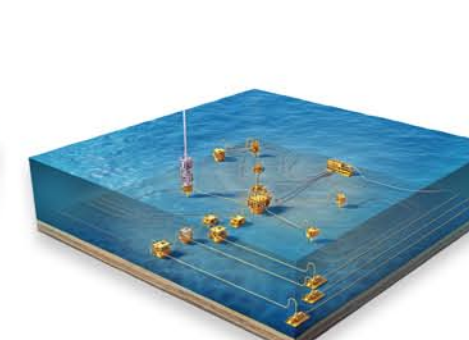

Cameron is here, too, from start to finish – to help boost success in every square inch of your field. It begins with a full complement of qualified personnel to help define, engineer, manufacture, deliver, coordinate and service your surface requirements safely and efficiently.

OFFSHORE PRODUCTION

Whether you're operating atop a TLP, Fixed-Leg Platform, SPAR or Floating Production Unit, let Cameron work with you to achieve significant savings of time and money without compromising safety. For ongoing support, you can count on CAMSERV™ – Cameron's Aftermarket Services, one of the world's largest networks – to be right there with you.

SUBSEA PRODUCTION

On the subsea floor, that takes experience. We're working with you, providing our tradition of customer-driven innovation – including the world's first and only DC electric subsea production control system, advanced subsea processing systems and large-bore retrievable choke technology.

TOPSIDES PROCESSING

On Floating Production Units in waters the world over, it's good to have Cameron as your one-stop shop and onboard partner. With our global presence, one of the world's largest, we can provide new equipment, retrofits, upgrades and superior aftermarket services responsively.

TRANSMISSION & STORAGE

Moving things from one place to another – efficiently, economically and safely – is not a simple matter. Here, our goals are yours: maximum runtime and productivity, achieved reliably and safely.

REFINING, PETROCHEMICAL & LNG

Increasing your efficiency on the spot in complex refining and separation operations demands leadership in expertise, quality and reliability. Let Cameron put our advantages in engineering, design, testing and process analytics to work in your operation.

INDUSTRIAL

Cameron is here to provide tailored solutions. Expect reliability and performance from our suite of compression, valve, measurement and control answers. We understand your need for compact footprints, high-pressure/high-performance centrifugal compression, oil-free air and gas and greater innovation.
