

Houston and the surrounding communities are home to more than 600 ABB employees. ABB has sales, service and engineering capabilities representing all aspects of ABB's product and solution portfolio. ABB maintains multiple facilities in the Houston area, each optimized to support a specific market segment, offering or service capability.

Westchase (at Westchase Park)

The Westchase at Westchase Park office specializes in process automation, motor and drive packages, plant electrification and analytical systems for all industries. It can deliver standalone products or fully engineered systems and service for all industries. It also delivers lifecycle services to the ABB-installed base throughout southern Texas and the entire Gulf Coast region. Westchase is also the global headquarters for ABB's Process Automation business.

Westchase (at CityCentre)

The Westchase at CityCentre office is home to Ventyx, an ABB company, which is a leading business-solutions provider offering software, data and advisory services. Ventyx offerings comprise a broad range of solutions to address the most critical needs of utility, power and communications companies, including asset management, customer care, energy analytics, energy operations, energy trading and risk management, mobile-workforce management and network management.

Sugar Land

The Sugar Land office is home to the Ventyx Network Management business. Network Management supports electric utilities with real-time systems for supervisory control, data acquisition and distribution management. These systems provide grid control for utilities, including support for new "Smart Grid" applications.

Houston Ship Channel

The marine service center on the Houston Ship Channel offers support for all aspects of marine automation, electrification and propulsion. It offers support for vessel power systems, machines, condition monitoring, propulsion, drilling systems, automation and control systems, switchgear and protection systems.

Houston (West Side)

ABB also maintain offices on Houston's west side for Baldor, an ABB company. Baldor Electric Motor Company provides the industry's broadest line of energy-efficient electric motors and adjustable speed drives. The mission of Baldor is to be the best marketer, designer and manufacturer of electric motors and drives.

Making Houston's energy go further?

As energy costs continue to rise, consumers and industry leaders are searching for ways to use it more efficiently. For energy intensive industries like refining and petrochemicals, energy is a significant portion of the total production cost. Efficient energy utilization is critical to business competitiveness and bottom line results. ABB is a global leader in power and automation technologies that enable utility and industry customers to improve their performance while lowering environmental impact. ABB is proud to be one of Houston's largest energy engineering companies, supporting the efficient exploration, production, transportation, distribution and consumption of energy. www.abb.com

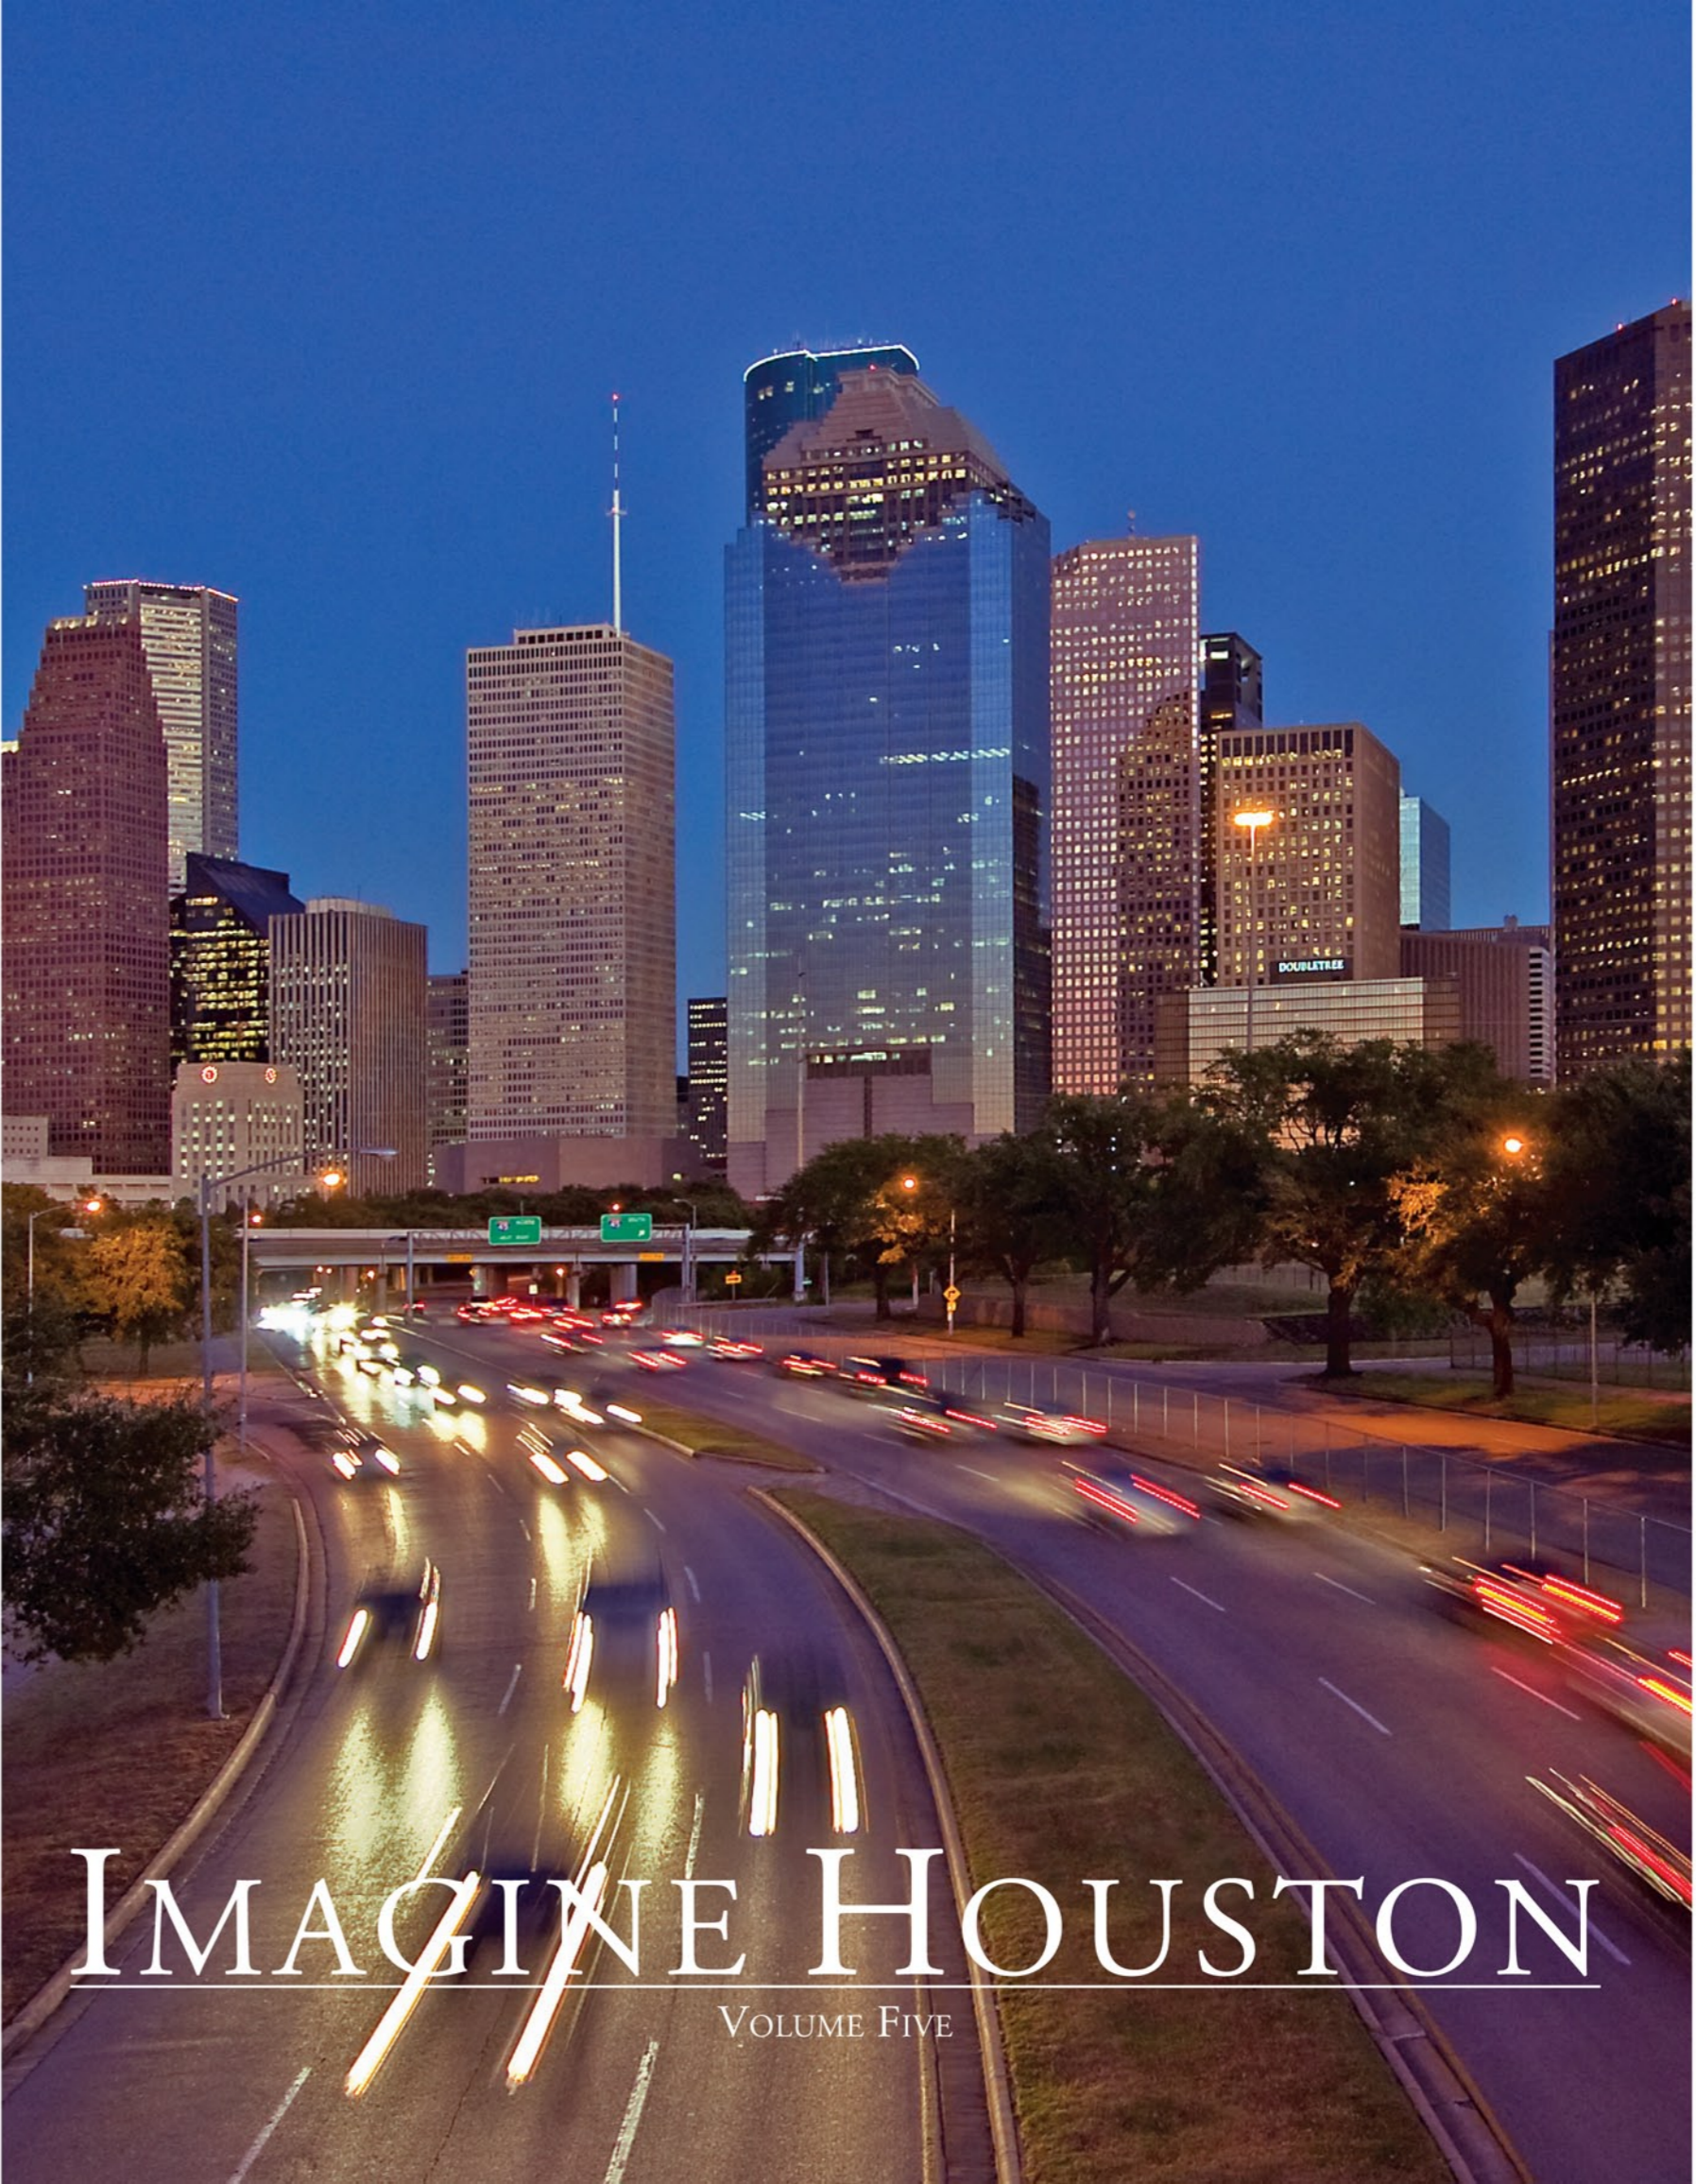

Absolutely.

IMAGINE HOUSTON

VOLUME FIVE

IMAGINE HOUSTON
VOLUME FIVE

IMAGINE HOUSTON

As the fourth-largest city in the nation, Houston's energy flow never ends. Houston provides residents with all of the amenities of a major city, including 24-hour facilities for dining, entertainment and shopping. The Inner Loop is one of the most diverse metropolitan areas in the country and features a multitude of attractions to see and do.
