THE COMPANY

Superior Energy Services, Inc., serves the drilling, completion and production-related needs of oil and gas companies worldwide through a diversified portfolio of specialized oilfield services and equipment that are used throughout the economic life cycle of oil and gas wells. The world's energy producers rely on us for the services, tools, equipment and exceptionally trained personnel needed to develop and produce oil and gas worldwide.

Founded in 1989 by Terence Hall, Superior Energy has grown from \$12 million in revenues and 125 employees to a publicly traded company with more than \$4 billion in revenues and nearly 14,000 employees worldwide. Superior Energy's approach to growth has been a proactive one—taking advantage of industry cycles, leveraging off its existing base and adapting to changing conditions. These efforts have been underpinned by the company's commitment to customer service and providing efficient, cost-effective services wherever they are needed.

Superior Energy has a history of developing specialized tools and technologies designed to meet customer needs. In its earliest days, the company pioneered the use of "rigless" plugging and abandonment services. Since then, Superior has been on the leading edge of a number of developments that benefit oil and gas producers throughout the life cycle of the well.

IN THE COMMUNITY

One of the goals at Superior Energy is to improve the quality of life in its communities by acting as a responsible neighbor and corporate citizen. Throughout the year, Superior works in partnership with its employees and local community leaders to determine how Superior Energy's resources can have the greatest impact on local needs.

Superior's employees give annually to the company's Catastrophic Relief Fund, established to help coworkers through devastating events, such as house fires, floods, tornados and hurricanes. Along with Superior's employees, the company also supports many other charitable organizations that do good works in the communities it serves. ■
