Since 1985, Meritage Homes has built more than 75,000 new homes across the United States while staying true to employing practical solutions that make a difference in homeowners' lives. As always, Meritage focuses on building incredible new homes and communities the way they can and should be built in prime locations at fantastic prices.

More than anything, Meritage Homes builds beautifully designed, energy-efficient homes and communities for people who appreciate the company's commitment to providing quieter, cleaner, healthier, smarter and safer living. Consistently exceeding minimum ENERGY STAR® requirements, Meritage builds homes that achieve Home Energy Rating System scores as low as 61 (typical resale homes score 130) and was the first national Top 10 homebuilder to make every home it builds 100-percent ENERGY STAR® certified. Notably, Meritage also introduced the first cost-effective NET ZERO home by a national builder and the first full EPA-certified Home.

With its unique environmentally conscious building practices, Meritage delivers homes that are twice as energy efficient on average as similarly sized typical U.S. homes. As such, they save homeowners up to 50 percent on utility bills—an average of \$50,000 during a 30-year mortgage. From using an array of moneysaving features ranging from spray-foam insulation and energy-efficient windows to ENERGY STAR® appliances using up to 50 percent less energy and water, Meritage consistently earns top EPA certification.

In addition, Meritage Homes has won a slew of awards with impressive accolades that include Forbes' Platinum 400 Best Big Companies of America, Texas's Builder of the Year five times and designation as ENERGY STAR® Partner of the Year. Most recently in 2014, Meritage was named ENERGY STAR® Partner of the Year for Sustained Excellence and ranked No. 2 in a Lifestory Research study on the Most Trusted Builders in America. ■
