

Founded in 1952 by the iconic leaders; W.T. Carter, Jesse Jones and Lee Cook with the addition singer Bing Crosby in 1956 **Phonoscope** was created with a vision that has would turn out to be a History of Telecom Innovations.

The history of **Phonoscope** is a history of firsts, including the Introduction of video/ audio interactive live exchange for commercial use in the early 50's, distance learning in the 60's, commercial fiber optic network in the late 70's, Fiber Optic "infobahn" in the 80's the concept of Tele-medicine in the 90's, the conversion to IP television in the 2000's and from 2010 the growth of Fiber-to-the Home.

Phonoscope Global is dedicated to serve Commercial Customers and Carriers with IP connectivity for Data, Voice and Video. Enterprise, Industrial, Educational, Medical, Hospitality, Retail and Residential campuses count on the dedicated care our expertise to deliver customized communication solutions for every need. The power of the Phonoscope Network backbone make us the most valuable last mile transport for Greater Houston. And our partnerships provide hand held global connections and the most advanced solutions in communications technology that help businesses succeed.

Phonoscope Fiber Communications is building the future of communication technology to the home. Established to provide true Fiber-To-The-Home service; the same business class service will be available inside the home to empower residents to enjoy more entertainment, the fastest speed available for internet and all the latest innovations in home technology.

Lee Cook, founder and CEO, continues at the helm of what he developed. The visionary technologist continues to lead the way daily with the same dedication to the Phonoscope mission that established the company over 60 years ago.

"Phonoscope will help to create the most technologically advanced community in the country by having a highly advanced communications infrastructure that enables a competitive advantage"
