

"R&D is critical to the long-term success of MOGAS. Year after year we have increased our funding for R&D to respond to our customer's new demands and to improve our products."

Matt Mogas

Leaders in Engineering R&D

MOGAS' continued commitment to R&D is evidenced through their formalized programs to develop critical applications involving valve coatings and flow control. Their staff includes dedicated research scientists who are experts in tribology, materials, applied coatings and fluid dynamics.

Already an industry leader in coatings, MOGAS continues to advance their patented technologies. Coating research and material study failure analysis lead to better understanding the root cause of failure for metallic and non-metallic materials.

Using computational fluid dynamics software, MOGAS engineers can predict the complex flow characteristics inside the pipeline and valve, where issues such as the formation of vortices and complex cavitation phenomena can be visualized. Studying fluid flow dynamics on MOGAS ball valves help them to develop the high quality products for which they are known.

Performance. Safety. Reliability.

Severe plant conditions can quickly turn into severe consequences for your business. That's why companies worldwide turn to MOGAS Industries—the leading provider of severe-service isolation and control valves.

Combining over four decades of experience with the most advanced manufacturing practices available, MOGAS helps ensure process integrity, uptime reliability and personnel safety. The result—immediate business efficiencies and lower total cost of ownership in the long term.

In short, MOGAS valves perform in the harshest environments so your company can too.

Why MOGAS

Choosing the right valve can be complicated when so many manufacturers claim to be solution providers, partners, control experts, design engineers or global leaders.

So, what differentiates MOGAS from other valve manufacturers? Why MOGAS?

The answer starts with our mission: to provide the very best severe service ball valves in the world, with application-specific focus.

The MOGAS Difference

- Valve Expertise. Building valves only in the severe service markets for over 40 years means unmatched expertise.
- Customer Support. Anytime. Anywhere. Servicing what we build helps us make better valves.
- Industry Knowledge. We employ tenured industry experts and engineers with extensive field experience.
- Design Innovation. Application-specific valve designs are born from investigative analysis.

Benefits to You

- Quality. Quality is non-negotiable.
- Safety. Safety isn't expensive. It is priceless and it is built into all of our products.
- Value. Because MOGAS valves are more durable and have a longer life cycle, they cost less over time.
- Results. The world's first application-specific PERFORMANCE GUARENTEE plus a Lifetime Warranty on materials and workmanship.

Experience the confidence of choosing MOGAS.
