PROFESSIONAL ENVIRONMENTS FOR LEARNING

11490 Westheimer Road  
Suite 600  
Houston, Texas 77077  
(281) 589-1400  
www.txtacc.com

**T**exas Training and Conference Centers (TxTACC) provides an upscale and adaptive professional environment for corporate training sessions and seminars. Each technology-based conference room can be equipped with PCs, administrative support and managed network services to maximize productivity, and every space is furnished with an office setting that allows participants to interact in a fully simulated business environment.

## TRAINING SUITES

TxTACC's rentable suites are designed for computer-training demonstrations and accommodate between 12 and 30 PCs, but without PCs, the suites can accommodate groups up to 50 with each participant at a 30" x 36" desktop area.

Each suite is fully networked with broadband Internet access (both wired and wireless) that duplicates an in-house training environment. TxTACC also provides physical support materials—such as pens and paper—and complimentary laser-printing and copying services. TxTACC's customer list reads like the "Who's Who" of Houston corporations from the smallest of startups, to the largest oil and gas companies. All suites are designed to create an upscale environment with a separate lobby area with snacks and beverages, which limits disruptions to the meetings.

## TECHNICAL SUPPORT SERVICES

TxTACC administration support services keep groups in touch. TxTACC's on-site services ensure quality system setup and software configurations as well as continuous technical support. The technical staff is on hand during all phases of the event, including the installation of student labs and instructors' presentations, review of installation with management and setup before the event, troubleshooting assistance during the event and backup support to guard against unforeseen failures.

TxTACC also provides presentation tools to enhance the overall learning experience for the group. Audio-visual capabilities include ceiling-mounted LCD video projection systems, motorized projection screens, multimedia sound systems and wall-mounted whiteboards.

## CATERING

At TxTACC, catering services of continental breakfasts and afternoon snacks are available for all rentals and served in the private lobby areas. Unlimited soft drinks are provided, and fully catered lunches also can be arranged for a fee.

## TECHNOLOGY

TxTACC continually acquires the latest in PC technology. As of this publication, the high-end PC labs feature Intel i7 processors, 8GB of RAM, 23-inch monitors and 2GB graphics cards. ■
