**A**ramco Services Company is the U.S.-based subsidiary of the world's leading oil producing and exporting company, the Saudi Arabian Oil Company (Saudi Aramco). Established in 1948 in New York City, Aramco Services operates as a vital link between Saudi Aramco and North America to help facilitate the safe and steadfast delivery of energy resources.

Aramco Services provides a wide range of support to Saudi Aramco, including engineering, quality assurance, marine vessel services and project management. It further assists Saudi Aramco with purchasing and logistics, financial services and information technology. For Saudi Aramco-sponsored students in North America, Aramco Services coordinates career development programs and training opportunities. The company also recruits personnel for professional positions abroad with Saudi Aramco.

### CARING FOR THE COMMUNITY

Aramco Services moved to Houston more than 30 years ago—joining other industry leaders to further strengthen the Bayou City's unique position as the energy capital of the world. Over that time, the company has given back to the community by actively supporting and participating in organizations dedicated to advancing quality education, safer neighborhoods, world-class cultural programs, improved health care, accessible housing and a cleaner environment.

### SAFEGUARDING THE ENVIRONMENT

In fact, one of Aramco Services' primary initiatives is to help safeguard the environment. The company works with renowned U.S. research centers to evaluate breakthrough technologies that produce cleaner petroleum fuels and more efficient engines. Aramco Services also provides oil spill response for Saudi Aramco in the Western Hemisphere. In compliance with the U. S. Oil Pollution Act of 1990, Aramco Services trains and qualifies its spill management team on behalf of Vela International Marine, Ltd., owner and operator of Saudi Aramco's global tanker fleet.

### WORKING AS A TEAM

In addition to its Houston headquarters, Aramco Services maintains an office in Washington, D.C. to collect information on economic and legislative trends. Aramco Services also owns three independent subsidiaries: Aramco Associated Company, which operates and manages aircraft; Saudi Refining, Inc., which refines and markets petroleum products; and Saudi Petroleum International, Inc., which markets crude oil to U.S. refiners.

For almost 60 years, Aramco Services Company has proudly answered the call to facilitate the safe delivery of reliable energy supplies to the United States—and it is still going strong. Please visit [www.aramcoservices.com](http://www.aramcoservices.com) for more information about the company. ■
