NuTech Energy Alliance is the world's premier reservoir-evaluation company. Our work reduces the risks and uncertainties oil and gas companies face when making decisions regarding the characterization and management of assets. NuTech's headquarters have been located in Houston for nearly 15 years. In addition, NuTech has six regional offices in Dallas, Oklahoma City, Denver, Mexico City, Calgary and London.

WE SEE THE RESERVOIR DIFFERENTLY
During the past 15 years, NuTech's reputation as a reservoir expert has grown through a commitment to developing unique applications to address the most important parameters clients face in the reservoir. Introducing a unique approach to petrophysics, NuTech also incorporates stimulation design,

geomechanical relationships, core laboratory services, reservoir engineering and characterization models. Each step of analysis utilizes a process designed to continually capture more understanding about the reservoir. To date, NuTech's team of nearly 100 geoscientists and engineers have studied over 60,000 wells from every global basin.

INNOVATIVE MINDSET
NuTech's management team continually works to develop new solutions to address the complex reservoir issues clients face when exploring for or producing hydrocarbons. Our goal is the same today as when NuTech was founded: to look for new ways to accurately characterize the finite elements of a reservoir that ultimately effect recoverability.

THE NUTECH FAMILY
NuTech encourages a community of involvement from all staff and provides monthly opportunities for them to participate in one of our sponsored nonprofits. NuTech employees enjoy life in the Northern Houston communities of Kingwood, Atascocita and Humble, which make commute times more than reasonable and family time much easier to foster and protect. Running a business in a residential community is a great way to ensure that employees are able to be a part of their families' lives and activities. There's no need to drive inside the loop to be a part of a globally focused high-tech company in the energy field; NuTech is right around the corner.

NUTECH'S INVITING CULTURE
NuTech has a professional, family and growth-oriented culture all in one. Named one of the Top 25 High-Tech Employers in Houston in 2012 by the *Houston Business Journal*, NuTech Energy Alliance provides the cutting edge tools for employees to see the reservoir differently. NuTech employees often comment on the professional growth that comes from the variety of work the company analyzes. Such a global perspective allows employees to become trusted technical advisors while defining the world's most complex reservoirs. ■

ABOVE: NuTech's headquarters have been located in Houston for nearly 15 years, and the company is an annual premier sponsor at the NAPE conferences.

COMMUNITY INVOLVEMENT: AUTUMN'S DAWN—A CENTER FOR NEW BEGINNINGS
NuTech is the proud Platinum Sponsor for Autumn's Dawn, a 501(c) (3) nonprofit adult service provider devoted to helping young adults with Autism Spectrum Disorders prepare for life as independent adults. Autumn's Dawn provides personalized programming in five life competency areas: self-determination, social skills, adult living, employment and lifelong learning. Autumn's Dawn is committed to providing evidence-based services in real-world settings to individuals who require support and assistance beyond high school.
